

Sol-Gel Transition in Di-(2-ethylhexyl) phthalate-Plasticized Poly(vinyl chloride)

Chang Hyung Lee,* Jae-Woon Nah, Kil-Won Cho, Seong Hun Kim, and Airan Hahn

1485-1489
Article

The scattering intensity I in the early stage is expected to increase exponentially with time t ;

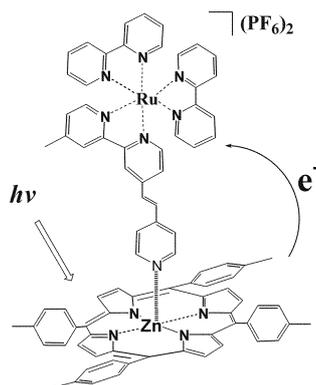

$$I(q, t) = I(q, 0)\exp[2R(q)t]$$

where $R(q)$ is the amplification factor.

Noncovalently Linked Zinc Porphyrin-Ru(bpy)₃ Dyad Assembled via Axial Coordination

Dol Kim and Eun Ju Shin*

1490-1494
Article

Chemical Equilibrium and Synergism for Solvent Extraction of Trace Lithium with Thenoyltrifluoroacetone in the Presence of Trioctylphosphine Oxide

Young-Sang Kim,* Gyo In, and Jong-Moon Choi

1495-1500
Article
